Minerva Slovakia Starts New Project at Tubapack

Prague, August 16, 2007

Tubapack, quality manufacturer of plastic and aluminum tubes, has signed a contract with Minerva Slovakia for system integration, including delivery of the ERP system QAD Enterprise Applications and the relevant hardware. Tubapack produces aluminum tubes which are primarily made for pasty and slightly sticky liquids used by the cosmetic, pharmacy and chemical industries. Laminated tubes, the other key product of Tubapack with more gentle material structure are made for filling with highly volatile substance, mainly cosmetic products.

Minerva Slovakia won the tender beating local and foreign vendors and enterprise systems with the ERP system QAD EA. Tubapack is based in Ziar nad Hronom, Slovakia and belongs to ZHS holding. The senior management of the holding company decided to implement QAD EA in the holding's other.

About Minerva

Minerva is a customer-focused company specializing in helping manufacturing and distribution companies solve their business problems by providing them with greater efficiency, control and productivity through the implementation of information systems. Minerva is able to provide its customers a full range of services from software installation and consultation to system integration and world class e-business solutions. Long-time experience in the Czech, Slovak, Russian, Ukrainian and Lithuanian Enterprise Resource Planning market and over 100 companies in these markets using the QAD Enterprise Applications (formerly MFG/PRO) information system confirm Minerva's commitment to customer satisfaction.
